SUMMARY

Student at the University of Warsaw with a strong background in competitive programming and **over 1 year** of professional software development experience. Very research focused and knowledgeable about applying machine learning to real-world projects, such as **QUMAM**. Solid foundation in mathematics and driven to apply technical expertise to high-impact solutions.

SKILLS

Languages: Python, C++, Rust, Haskell, TypeScript, Java
ML: PyTorch, JAX, MLflow, Ray, Airflow, Spark, scikit-learn, NumPy, Pandas, Polars
Web: React, Django, FastAPI, Spring
DevOps: CI/CD, Kubernetes, Google Cloud, Terraform

PROJECTS

QUMAM

Learning platform for managing math courses and students, with a rich UI for creating courses and exercises, a student portal for tracking progress, and **LLM** capabilities such as math task generation from an image.

Python, LiteLLM, OpenAI, TypeScript, React, Django, PostgreSQL

Many more projects are available in my [portfolio](#) and [GitHub profile](#).

EXPERIENCE

7/2026 – 9/2026	Software Engineer Intern	Visa, Warsaw
- Developed a scalable MLOps pipeline for a device-fingerprint fraud detection system. - Architected the end-to-end training and evaluation workflow. - Trained a transformer-based model to detect fraudulent activity across high-volume transaction streams. PyTorch, MLflow, Ray, Airflow, Spark		
7/2024 – 10/2024	Junior Software Engineer	RadCode, Warsaw
- Worked as a contractor for an American startup founded by a Forbes 30 Under 30 laureate. - Developed a Web3 protocol with goal to innovate decentralized finance (DeFi). TypeScript, Solidity, ReactJS, Hardhat, Vite, GraphQL		
7/2023 – 7/2024	Junior Software Engineer	Cognizant, Warsaw
Project 1 - Acted as a project lead, actively contributing to the development of an internal web application using the Kanban methodology. - Successfully deployed version 2.0 of the application. Java, Kotlin, Spring, Jenkins, TypeScript, ReactJS, Vite, MongoDB, SendGrid Project 2 - Worked as contractor for American company. - Refactored and optimized the application's codebase to adhere to clean code standards. - Integrated Kafka using outbox pattern for efficient message queuing and processing. Java, Spring, GitHub Actions, TypeScript, ReactJS, PostgreSQL, Kafka		

EDUCATION

2024 - current	M.Sc. in Machine Learning	University of Warsaw (MIMUW)
2026 - current	B.Sc. in Physics	University of Warsaw (FUW)
2022 - current	B.Sc. in Mathematics <i>Thesis:</i> Finding optimal timesteps for score-based diffusion models	University of Warsaw (MIMUW)
2021 - 2024	B.Sc. in Computer Science <i>Thesis:</i> Gitoptim - a tool for automating programmer's work using large language models	University of Warsaw (MIMUW)

ACHIEVEMENTS

- Distinction in the 1st round of the 28th Polish Olympiad in Informatics
- Finalist of the 4th edition of the Jagiellonian Mathematics Tournament
- Tutored two participants of Polish Olympiad in Informatics. One reached international level.

LANGUAGES

English - B2/C1 (FCE Certificate), **Polish** - native

INTERESTS

- Open source: contributed to LibreOffice
- Programming languages (compilers, language design)
- Linux
